

IN THE WRITTEN SPECIFICATION:

Please amend the written specification for the above-identified patent application as follows wherein replacement paragraphs or sections are provided with deleted material is marked with a ~~striketrough~~ and new material is underlined to show the changes made:

Please replace the paragraph on page 4, lines 3 to 16, in the original specification with the following amended paragraph (with changes shown):

A1
The invention provides a camera subassembly which includes a housing, a window, a lens, at least a first member, and movement imparting apparatus. The housing has a first opening through which light can enter into the housing and a second, opposing opening. The window closes the first opening so that the housing and the window are formed so that, when the housing is mounted to a substrate so that the substrate closes the second opening, the housing, the first window lens, and the board from an enclosure which is substantially sealed against ingress of contaminants. The lens is located with in the enclosure. The first member mounts the lens to the housing so that the lens is moveable relative to the housing backward and forward in a direction in which light passes from the first opening through the housing to the second opening. The movement imparting apparatus is at least partially secured to the housing and at least partially secured to the lens and, when operated causes backward and forward movement of the lens in the direction in which light passes through the housing.
